

Copper Filter Set

High quality copper filters for gold standard X-Rays.

KEY FEATURES

- > Copper disk thicknesses:
 - XR150: 0.8mm / 0.0315"
 - XRS3: 1.00mm / 0.04"
 - XRS4: 1.5mm / 0.062"
- > The Copper Filter Set consists of:
 - 1 x Purpose-built mount for the Golden Engineering XR150, XRS3 and XRS4
 - 3 x Copper Disks
 - 1 x Bespoke Pouch

TECHNICAL SPECIFICATION

- > Weight: 400g (14oz)
- > Pouch Dimensions: 100mm x 100mm x 50mm (3.9" x 3.9" x 0.2")
- > Removes the lower energies from the output of the Golden Engineering generators to increase radiograph image quality
- > Each copper disk fits onto the front end of the GE X-Ray generators using the purpose-built mount
- > Purpose-built mount is compatible with the XR150, XRS3 and XRS4 GE generators
- > Each filter is designed to suit each generator's energy levels
- > Made from grade C103 copper (99.3% copper and 0.7% phosphorous) for excellent filtering properties
- > Highly resistant to tarnishing through oxidation
- > Each filter is UV printed with the details of the corresponding GE generator. These are available for the XR150, XRS3 and XRS4.
