

Ultrasonic Analysis Tool (USAT)

Identification, analysis and replication of ultrasonic signals

KEY FEATURES

- > Detection, analysis and production of ultrasonic signals to desensitise volumetric ultrasonic sensors
- > Three adjustable probe heads (1xRx, 2xTx) for accurate positioning, plus additional search probe for initial detection
- > Visual indication of detected ultrasonic signal strength
- > Can be deployed and removed from a target system without detection
- > Low profile 4 button user interface

EQUIPMENT SUMMARY

- > Dimensions: 112mm x 54mm x 27mm (4.4' x 2.12' x 1.06')
- > Operational Temperature Range : -10C to 40C (14F to 104F)
- > Ruggedised PA12 enclosure
- > Insulated lemo connectors to prevent unintended connections
- > A choice of cables in either ultra-flexible silicone or hardwearing PVC
- > Battery percentage displayed during use
- > All PCBs and soldering adhere to IPC-3 standards (aerospace, military and medical applications)
- > USAT undergoes detailed calibration and testing. Individual test records are stored and available on request
